SUMMARY

Fourth-year Computer Science (Honours) student graduating April 2026, with hands-on experience in cybersecurity frameworks, risk assessment, and security advisory. Practical background applying NIST CSF and CIS controls, conducting threat analysis using SIEM platforms, and delivering technical security guidance. Strong communicator with experience presenting cybersecurity content through workshops and technical documentation.

EDUCATION

Bachelor of Science (Honours) Computer Science, Concentration in Software Engineering
Brock University, St. Catharines, ON — Sept 2021 – Apr 2026

SKILLS

Security Frameworks & Standards: NIST Cybersecurity Framework, CIS Controls, PCI-DSS, GDPR, OWASP, Risk Assessment & Quantification, Security Control Gap Analysis, Compliance Documentation
Security Operations & Tools: Splunk SIEM, SIEM/IDS/IPS Concepts, Threat Intelligence Integration (VirusTotal, AbuseIPDB, OTX AlienVault, CVE CIRCL), Incident Response, IOC Identification, Log Analysis, Burp Suite, Nmap, Metasploit, Wireshark, Kali Linux
Technical & Infrastructure: Python (automation, scripting), Bash, PowerShell (basic), SQL, Identity & Access Management Concepts, Active Directory, Cloud Security (AWS, Azure), Linux/Windows Administration, Docker, CI/CD
Advisory & Communication: Technical Documentation, Security Reporting, Stakeholder Communication, Workshop Facilitation, Event Coordination, Webinar Content Development, Cross-Functional Collaboration
Soft Skills: Analytical Thinking, Problem-Solving, Self-Directed Learning, Team Collaboration, Adaptability, Attention to Detail, Curiosity

EXPERIENCE

Software Engineer Intern | Karmeka | Toronto, ON | Aug 2025 - Present
- Implemented secure API integration practices and input validation across enterprise platforms, applying defense-in-depth principles to protect data flows and prevent unauthorized access.
- Established automated CI/CD pipelines with integrated security controls, reducing manual deployment errors and ensuring consistent security posture across development and production environments.
- Collaborated with cross-functional stakeholders to translate business requirements into technical security solutions, demonstrating advisory skills in fast-paced agile environment.

Software Developer/AI Engineer | Venture for Canada Intrapreneurship | Remote | Oct 2025 - Nov 2025
- Built data filtering and validation pipelines processing 50+ sources daily, applying data integrity controls and improving signal-to-noise ratio by 60%.
- Documented system architecture, security decisions, and operational workflows to support maintainability and knowledge transfer, reducing new developer onboarding time by 40%.
- Implemented systematic troubleshooting processes to identify and resolve root causes rather than patching symptoms, achieving 99.5% uptime for production services.

Supervisor | Digital Attractions | Mar 2025 - Present
- Led structured onboarding and training for new team members, improving operational efficiency by 35% through process documentation.
- Implemented systematic troubleshooting processes to resolve technical issues, reducing customer wait times by 25%.

ACADEMIC PROJECTS

SecureShop Risk Assessment GitHub | Personal Project | Feb 2025

- Conducted comprehensive security assessment of simulated e-commerce environment applying NIST CSF, PCI-DSS, GDPR, and OWASP frameworks to identify 18 control gaps across technical and administrative domains.
- Quantified risk exposure through loss expectancy calculations ($450K identified exposure) and delivered prioritized remediation roadmap with cost-justified security controls demonstrating 383% ROI.
- Produced executive-level security documentation and technical recommendations suitable for presenting to institutional leadership and governance bodies.
- Technologies: NIST CSF, PCI-DSS, GDPR, OWASP, Excel

AI Threat Detection System GitHub | Personal Project | Dec 2025

- Built ML-powered anomaly detection system using Isolation Forest and DBSCAN clustering to identify suspicious behavioral patterns in log and event data, mirroring enterprise SIEM threat detection workflows.
- Integrated multiple threat intelligence APIs (VirusTotal, AbuseIPDB, OTX AlienVault, CVE CIRCL) to build comprehensive multi-source data aggregation and correlation pipeline for threat enrichment.
- Deployed scalable event streaming architecture with Kafka and Elasticsearch for real-time log ingestion and indexed alerting, demonstrating understanding of enterprise security monitoring infrastructure.
- Technologies: Python, scikit-learn, TensorFlow, VirusTotal API, AbuseIPDB, CVE CIRCL, PostgreSQL, Docker

VibeMap GitHub | Live Demo | Personal Project | Jan 2026 - Feb 2026

- Built full-stack application with 8-endpoint REST API, delivering 125 unit tests at 88% code coverage demonstrating disciplined quality assurance practices.
- Designed end-to-end data pipeline (CSV ingestion → SQL cleaning → K-Means/KNN model training) with deployment to production, showcasing data analysis and visualization capabilities relevant to security analytics reporting.
- Technologies: Python, pytest, scikit-learn, SQL, Flask, React, TypeScript, Docker, ECharts, Power BI, Tableau

WatchNext Mobile App | Brock Uni Project | Jan 2026 - April 2026

- Developed full-featured Java Android application with Firebase Auth, Supabase database, and TMDb REST API integration using Retrofit library for API communication and data retrieval.
- Implemented MVC architecture with comprehensive manual testing across authentication flows, database CRUD operations, API response handling, and recommendation engine accuracy.
- Performed database testing with SQL queries to validate data integrity, user watchlist operations, and rating/review storage in Supabase PostgreSQL backend.
- Technologies: Java, JUnit, Firebase Auth, Supabase, TMDb API

Instagram Engagement Automation Platform GitHub | Brock Uni Project | Sept 2025 - Dec 2025

- Implemented OAuth 2.0 authentication and SQLAlchemy-backed webhook processing achieving 98.7% automated response success rate CI/CD via GitHub Actions for zero-downtime deployments.
- Technologies: Python, Flask, SQLAlchemy, OAuth 2.0, GitHub Actions

PROFESSIONAL DEVELOPMENT

Cybersecurity Executive | Brock's Cybersecurity Club | Sept 2023 - Present

- Organize and host CTF competitions and cybersecurity workshops, including sessions with the Chief Security Officer of Microsoft.

Toronto CTF | Cybersecurity Ontario | Oct 2025

- Investigated simulated enterprise security incidents using Splunk SIEM, analyzing log entries to identify IOCs, suspicious authentication patterns, and attacker behavior in a time-pressured environment.

CTF Practice | TryHackMe link & HackTheBox | Jan 2023 - Present

- Regularly practice offensive and defensive techniques including web exploitation, privilege escalation, network enumeration, and reverse engineering across realistic lab environments.

CERTIFICATIONS

- **CompTIA Security+** | In Preparation
- **Google Cybersecurity Professional Certificate** | Coursera | Jul 2024
- **AWS Cloud Practitioner Essentials** | IBM | Feb 2026
- **HTB Certified Junior Cybersecurity Associate Path** | HackTheBox | Dec 2025
- **Virtual Security Analyst** | Deloitte
- **Security Engineer Path** | TryHackMe
- **Jr Penetration Tester** | TryHackMe
